# RIVA Xtreme

Ribbed panels for furniture & Interior

## New RIVA Surface with »extreme« ribbed structure

The pure elegance of the three-dimensional ribbed structure offers a wide range of possible applications in high-quality interior design, such as the furnishing of stores, restaurants, hotels, bars, exhibition stands, living areas and also in furniture construction.

## RIVA Xtreme Flex

Riva Xtreme Flex can be used to create curves or curved surfaces.

Due to the flexible and therefore bendable surface in only 6 mm thickness, the production of moulded parts with inner or outer radii is possible, for example for furniture parts, as front panel for counters, bar and reception counters, column claddings, shop fittings and much more. With RIVA Xtreme you give your furniture and interior design projects a distinctive design.

### APPLICATION AREAS

- Hotel interiors
- Shopfittings
- Gastronomy
- Object furnishings
- Private interior fittings
- Yacht interiors
- Exhibition stand design
